# Subject Index

A
Abuse
forms of, those obese children undergo, 202–203 (Editorial)
Acquired lipodystrophy
in adolescent male with type 1 diabetes mellitus, leptin replacement, 133 (Abstract)
ADHD, *see* Attention Deficit/Hyperactivity Disorder
Adolescents
ADHD in, diagnosis and treatment, 47–51 (Child health policy column)
African-American, clinical presentation of atypical diabetes in, 129–130 (Abstract)
and young adults, decreased bone density after treatment of GH deficiency and insufficiency, 129 (Abstract)
eating behaviors in, barriers that influence, 258–267
health care for, systematic monitoring of pubertal development, 75–82
impacts of the Immune of Life for Teens module of Health Promotion for Early Adolescents Project
application on the coping behaviors and mental health of early, 461–468 (International Pediatric Nursing column)
obesity and cardiovascular risk factors: intervention recommendations, 3–14
perceptions of parental roles and involvement in diabetes management, 405–414
racial/ethnic specific prevalence for physical symptoms, 153–162
with diabetes, importance of family in health care of, 373–382 (International Pediatric Nursing column)
with GHD, impact of oral estrogen replacement therapy on GH dose requirements, 137 (Abstract)
with type 1 diabetes, disordered eating behaviors (DEBs) among, 383–388 (International Pediatric Nursing column)
with type 2 diabetes, care of, 96–106
Adolescents with Special Health-Care Needs (ASHCNs)
quality health care for, issues and clinical implications, 15–24
Adult-onset diabetes, *see* Diabetes mellitus, type 2
Advanced Practice Nurses (APNs)
caring for high risk patient population groups, 45–46 (Child in the Community column)
AHO, *see* Albright Hereditary Osteodystrophy
Albright Hereditary Osteodystrophy (AHO)
and growth hormone deficiency, 133–134 (Abstract)
American Academy of Nursing
health care quality and outcome guidelines for nursing of children and families, 149–152 (Editorial)
American Heart Association (AHA)
guidelines on family members' presence during resuscitation, 145–147 (Clinical Practice column)
American Norditropin Studies: Web Enabled Research
program, 135 (Abstract)
Amyoplasia congenita
growth hormone therapy for, 131 (Abstract)
ANSWER, *see* American Norditropin Studies: Web Enabled Research
Anticonvulsants
recommendations regarding needed treatment of, 477–484
APNs, *see* Advanced practice nurses
AtroPen
recommendations and guidelines for usage of, 477–484
Atropine
use in children after nerve gas exposure, 477–484
Attention deficit/hyperactivity disorder (ADHD)
children with, self-perception in, 235–245
Attention Deficit/Hyperactivity Disorder (ADHD): diagnosis and treatment, 47–51 (Child Health Policy column)
Autistic spectrum disorder
in pediatric primary care, role of nurses in screening for, 163–169
Autoimmune thyroiditis
screening patients with, for celiac disease, 132 (Abstract)

*0882-5963/$ - see front matter*
*doi:10.1016/S0882-5963(05)00386-6*

B
Babies breathing
caring for high risk patient population groups, 45–46 (Child in the Community column)
Bioethical principles
and common ethical dilemmas faced by nurses in pediatric end-of-life care, 360–369
Body mass index (BMI)
and waist circumference, relationship between, in normal and obese children, 129 (Abstract)
Bone density
decreased, after treatment of growth hormone deficiency and insufficiency, 129 (Abstract)
Book and media reviews
Magula: *Twelve Kids and a Ph.D.*, 213
McClowry: *Your Child's Unique Temperament: Insight and Strategies for Responsive Parenting*, 287
Seibeti, Drolet & Fetro: *Helping Children Live with Death and Loss*, 372
Shinskie & Lauwers: *Pocket Guide for Counseling the Nursing Mother*, 144
Zaumeyer: *How to Start an Independent Practice: The Nurse Practitioner's Guide to Success*, 52
Breastfeeding
benefits of, 45–46 (Child in the Community column)
initiation and duration in Lebanon hospital, 53–59 (International Pediatric Nursing column)
Brief pain inventory
to assess pain in McCune Albright syndrome, 128 (Abstract)
"Bright Futures" model
for PNPs and physicians, integration of developmental assessment into pediatric primary care, 163–169

C
Cardiac surgery
lengths of stay in hospital and presence of complications for infants undergoing, 430–440
Cardiac transplants
pediatric, care of patients, preparing nurses involved in, 139–143
Cardiovascular risk factors
obesity-related, intervention recommendations, 3–14
Care practices
decision making for children by caregivers who are Taiwanese temporary residents in the United States, 453–460 (International Pediatric Nursing column)
Caregiver–child interaction
in infants and toddlers born premature, 181–189
Caucasian male
phenotypic male with 46XX genotype, short stature evaluation, 132 (Abstract)
Celiac disease
diagnosis in endocrine patient, elevation of transaminases, 132 (Abstract)
Central precocious puberty
anaphylactic reaction following treatment with GnRH analog for, 131 (Abstract)
Child Health Policy column
attention deficit/hyperactivity disorder: diagnosis and treatment, 47–51
needs of children with special health-care needs (CSHCN), National survey, 207–210
Child Health Policy
role of health care professionals in child-to-child unintentional injury and death from firearms in the United States, 448–452
Child health
improvements in, 285–286 (Child in the Community column)
Child in the Community column
babies breathing, 45–46
improving child health, 285–286
killing families, prevalence of HIV/AIDS, 211–212
role of nurses in healing children, 370–371
Childhood hypoparathyroidism
treatment with human parathyroid hormone, 131 (Abstract)
Childhood obesity
contributing factors affecting, and tips on managing, 201–202 (Editorial)
role of pediatric nurses and nurse practitioners in educating families on prevention, 203–206 (Editorial)
social and psychological problems associated with, 202–203 (Editorial)
Childhood onset growth hormone deficiency (COGHD) patient
role of pediatric endocrine nurse, 129
Childhood onset growth hormone deficiency (COGHD) patients
knowledge/beliefs and practice of pediatric

endocrine nurses caring for, 129 (Abstract)
life-long GH therapy, transition to adult care, role of pediatric nurses, 136 (Abstract)
Children
ADHD in, diagnosis and treatment, 47–51 (Child health policy column)
by caregivers who are Taiwanese temporary residents in the United States, decision making about
care practices for, 453–460 (International Pediatric Nursing column)
diabetic, increased risk for growth failure, 128–129 (Abstract)
drawings as facilitators of communication, a meta-analysis, 415–423
febrile, nursing telephone triage and its influence on parents' choice of care for, 424–429
feeding problems, tracking patterns of, 228 (Abstract)
fractures in, unique characteristics of, 298–304 (Clinical Practice column)
growth screening, necessity of, 128–129 (Abstract)
helping to live with death and loss, 372 (Book review)
importance of accurate measurement of linear growth in, educational level of RNs, 64–74
improving the experience of hospitalization for Hawaiian children, 170–176
normal and obese, relationship between waist circumference and BMI in, 129 (Abstract)
nurses as role models in healing, 370–371 (Child in the Community column)
obese, forms of abuse, 202–203 (Editorial)
preschoolers, born preterm vs. full term, child care use by low-income single mothers, 246–257
short stature due to IGFD, treatment with RhIGF-1, 135 (Abstract)
Stiff Man syndrome with type 1 diabetes, 131–132 (Abstract)
type 2 diabetes in, prevention of, role of nurses, 136 (Abstract)
use of Atropine after nerve gas exposure, 477–484
use of imagery, before and after surgery, 228–229 (Abstract)
with ADHD, self-perception in, 235–245
with atypical diabetes, clinical presentation of, 129–130 (Abstract)
with chronic feeding problems, stress in care givers of, 268–275
with congenital hyperinsulinism, effects of hypoglycemia on developmental outcome, 109–118
with congenital hyperinsulinism, PET scan to localize focal lesions in, 137 (Abstract)
with congenital hypothyroidism, NMFUP for, 128 (Abstract)
with disabilities, professional support to parents, 214–223
with GHD, effectiveness of Norditropin in, 135 (Abstract)
with GHD, need for transition assessment and management, 137 (Abstract)
with hyperthyroidism, advances in assessment, diagnosis, and treatment of, 119–126
with IGF deficiency (IGFD), safety of rhIGF-1 in, 135 (Abstract)
with OXPHOS, various symptoms of, 133 (Abstract)
with type 1 diabetes, education and telephone case management for, 83–95
with type 2 diabetes, care of, 96–106
Children and family
common global health goals, 34–44
health care quality and outcome guidelines for nursing of, 149–152 (Editorial)
Children temperament
your child's unique temperament, insight and strategies for responsive parenting, 287 (Book review)
Children with life-threatening conditions
parental perceptions on continuity coordination of care for, 335–346
Children with Special Health-Care Needs (CSHCN)
needs of, National survey, 207–210 (Child Health Policy column)
Child-to-child
unintentional injury and death from firearms in the United States, role of health care professionals, 448–452 (Child Health Policy)
Chronic disease management
working alliance in, a pilot study of instrument reliability and feasibility, 190–200
Clinical Practice column
complex care patients, 389–395

distance learning project between Houston Gulf Coast Chapter of SPN and UTMB, 60–62
extremity fractures in children, 298–304
family presence during pediatric resuscitation, 145–147
time-efficient strategies to ensure vaccine risk/benefit communication, 469–476
Complex care patients, 389–395 (Clinical Practice column)
Congenital heart defects (CHDs)
surgical risk factors or determinants of survival of infants with, 430–440
Congenital hyperinsulinism
children with, PET scan to localize focal lesions in, 137 (Abstract)
effects of hypoglycemia on developmental outcome in children with, 109–118
feeding abnormalities in, 134 (Abstract)
Congenital hypothyroidism (CH)
children with, measurement of the acceptability of NMFUP for, 128 (Abstract)
Continuity and coordination of care
perception of parents of children with life-threatening conditions, 335–346
CSHCN, *see* Children with Special Health-Care Needs

D
Depression,
great, Twelve Kids and a Ph.D., 213 (Book review)
Diabetes
importance of family in health care of adolescents with, 373–382 (International Pediatric Nursing column)
increased risk for growth failure in children with, 128–129
parental monitoring of, 405–414
Diabetes, atypical
clinical presentation of children with, 129–130 (Abstract)
Diabetes management
adolescents' perceptions of parental roles and involvement in, 405–414
Diabetes mellitus, type 1
acquired lipodystrophy in adolescent male with, leptin replacement, 133 (Abstract)
affecting factors of disordered eating behaviors (DEBs) among Turkish adolescents with, 383–388 (International Pediatric Nursing column)
and trisomy 21, screening patients with, for celiac disease, 132 (Abstract)
and type 2, education for patients with, 137 (Abstract)
child with, Stiff Man syndrome in, 131–132 (Abstract)
disordered eating behaviors (DEBs) among adolescents with, 383–388 (International Pediatric Nursing column)
in children, nursing interventions and their impact on glycemic control, 83–95
Diabetes mellitus, type 2
and CVD, associated risks of adolescent obesity, guidelines and intervention strategies, 3–14
and type 1, education for patients with, 137 (Abstract)
care in children and adolescents with, 96–106
in obese children, role of nurses in prevention of, 136 (Abstract)
Diabetic ketoacidosis
outpatient management of, 132 (Abstract)
Disabilities
children having, meanings of being a supporter to families with, 214–223
Disordered eating behaviors (DEBs)
affecting factors among Turkish adolescents with Type 1 diabetes, 383–388 (International Pediatric Nursing column)
Dual x-ray absorptiometry (DEXA) scans
screening for low bone density, 129 (Abstract)

E
Eating patterns and nutrition
in adolescents, barriers related to, 258–267
Endocrine patient
celiac disease in, mild elevation of transaminases, diagnosis of, 132 (Abstract)
Endocrine system
basis for pediatric nursing, 63 (Editorial)
special issue on, 63–147
Erratum, 234
Ethics in pediatric end-of-life care
a nursing perspective, 360–369
Evidence-Based Practice (EBP)
basics and Society of Pediatric Nurses (SPN) recommendations, 396–398

F
Families
adolescents with special health-care needs (ASHCNs), relationship with, 15–22
and children, health care quality and outcome

guidelines for nursing of, 149–152 (Editorial)
and parents, participation in care giving to critically ill neonates, 45–46 (Child in the Community column)
articles on health care needs of infants and children, 1–2 (Editorial)
assessing children for ADHD within the context of, 47–51 (Child Health Policy column)
history in diagnosis of OXPHOS disease, 133 (Abstract)
invigorated parenthood, experiences of professionals' support on having a disabled child, 288–297 (International Pediatric Nursing column)
low-income single mothers, need to address child care use issues, 246–257
parent/caregiver stress during pediatric hospitalization for chronic feeding problems, 268–275
prevalence of HIV/AIDS in families, 211–212 (Child in the Community column)
significance, in diagnosis of PHP 1 a, 133–134 (Abstract)
with disabled children, being supporter to, 214–223 (International Pediatric Nursing column)
Feeding problems, chronic
pediatric hospitalization, parent/caregiver stress during, 268–275
Fibrous dysplasia
skeletal site involvement and pain in McCune Albright syndrome and, 128 (Abstract)
without McCune Albright syndrome, 133 (Abstract)
Fractures
in children, requiring emergent attention, 298–304 (Clinical Practice column)

G
Genotype, 46, XX
rare phenotypic male with short stature evaluation, 132 (Abstract)
GHD, *see* Growth hormone deficiency
Girls
poor metabolic control and menstrual problems due to disordered eating behaviors (DEBs), 383–388 (International Pediatric Nursing column)
Glycogen storage disease (GSD)
growth failure and eating disorder in, 133 (Abstract)
Grounded theory method
for studying the process of decision making for children by caregivers who are Taiwanese
temporary residents in the United States, 453–460 (International Pediatric Nursing column)
Growth failure
screening patients with, for celiac disease, 132 (Abstract)
Growth hormone (GH) therapy
for amyoplasia congenita, 131 (Abstract)
non compliance to, relationship between growth rates and, 135 (Abstract)
patients receiving continued care, systematic approach for improvement, 136 (Abstract)
Growth hormone deficiency (GHD)
adolescent and young women with, impact of oral estrogen replacement therapy, 137 (Abstract)
bone density after growth hormone (GH) treatment of, 129 (Abstract)
and insufficiency in adolescents/young adults, decreased bone density after GH treatment of, 129 (Abstract)
Guidelines
health care quality and outcome, 149–152 (Editorial)
Healthy People 2010, 15–24

H
Hawaiian ways of healing
understanding and developing cultural sensitivity to, 170–176
Head Start children
increased risks for asthma morbidity in secondhand smoke exposure, 227–228 (Abstract)
Healing children
role of nurses in, 370–371 (Child in the Community column)
Health belief model (HBM)
for studying contributing factors to preschool unintentional injury (PUI), 441–447
Health care
disparities of children and youth, a pediatric nursing concern, 399–401 (Editorial)
for adolescents with special health-care needs (ASHCNs): issues and clinical implications, 15–24
needs of infants, children, youth, and their families, articles on, 1–2 (Editorial)

quality and outcome guidelines for nursing of children and families, 149–152 (Editorial)
Health care professionals
an interdisciplinary educational approach on pediatric palliative care, 326–334
role in child-to-child unintentional injury and death from firearms in the United States, 448–452 (Child Health Policy)
Health promotion
and risk behaviors of college students in rural setting, 25–33
Health Promotion for Early Adolescents Project
impacts of the Immune of Life for Teens module application on the coping behaviors and mental health of early adolescents, 461–468 (International Pediatric Nursing column)
Health risk behavior
health promotion and risk behaviors of college students in a rural setting, 25–33
Health-care providers
on mission trips, 34–44
Healthcare setting
pediatric, cost–effective procedural-support music therapy in, 276–284
Healthy People 2010 guidelines
Department of Health and Human Services' (DHHS), 15–24
Heart transplants, pediatric
care of patients, preparing nurses involved in, 139–143
Hospitalization, pediatric
for chronic feeding problems, parent/caregiver stress during, 268–275
Hospitals, mother-friendly
initiation and duration of breastfeeding in Lebanon, 53–59 (International Pediatric Nursing column)
Hyperinsulinism, congenital
children with, PET scan to localize focal lesions in, 137 (Abstract)
effects of hypoglycemia on developmental outcome in children with, 109–118
feeding abnormalities in, 134 (Abstract)
Hyperthyroidism
in children, advances in assessment, diagnosis, and treatment of, 119–126
Hypoglycemia
effects on developmental outcome in children with congenital hyperinsulinism, 109–118
Hypoparathyroidism, childhood
treatment with human parathyroid hormone, 131 (Abstract)
Hypothalamic precocious puberty
treatment plan designed for future, 132 (Abstract)
Hypothyroidism
signs and symptoms of, 119–126

I
IGF, *see* Insuline-like growth factor
Infants
and toddlers, born premature, caregiver–child interaction in, 181–189
hypoparathyroidism, human parathyroid hormone therapy for, 131 (Abstract)
infant mortality ratios (IMR), social indicator of development, 53–59 (International Pediatric Nursing column)
lengths of stay in hospital and presence of complications in cardiac surgery of, 430–440
preterm, behavioral and hormonal reactivity to handling, 128
very low birth weight (VLBW) infants and their families, transitional care by APNs, 45–46 (Child in the Community column)
Initiative for Pediatric Palliative Care (IPPC)
development of an educational approach on pediatric palliative care by, 326–334
Injury, unintentional
and death from firearms in the United States, role of health care professionals in preventing, 448–452 (Child Health Policy)
contributing factors to preschool, 441–447
Institute of Medicine (IOM)
seven working principles by, 309–310 (Editorial)
Insuline-like growth factor (IGF)
deficiency of/insensitivity to GH, RhIGF-1 therapy, 135 (Abstract)
Integrated model for palliative and end-of-life pediatric care, 311–325
International Congress of Endocrine Nurses (ICEN)
2004, abstracts presented at, 138 (Abstract)
International nursing practice
and education workplace, creation of, 34–44
International Pediatric Nursing column
from Norway, role of parenting in health-related quality of life and metabolic control in adolescents with diabetes, 373–382
from Sweden, invigorated parenthood, experiences of professionals' support when having a disabled child, 288–297
from Taiwan, decision making about care

practices for children by caregivers who are Taiwanese
temporary residents in the United States, 453–460
from Thailand, impacts of the Immune of Life for Teens module of Health Promotion for Early Adolescents Project application on the coping behaviors and mental health of early adolescents, 461–468
from Turkey, affecting factors of disordered eating behaviors (DEBs) among Turkish adolescents with and without Type 1 diabetes, 383–388
in Lebanon, mother-friendliness of hospitals, initiation and duration of breastfeeding, 53–59
from Sweden, families with children who have disabilities, meanings of being a supporter to, 214–223

J
*Journal of Pediatric Nursing*
a framework for integrated pediatric palliative care, 311–325 (Editorial)
health care disparities of children and youth, a pediatric nursing concern, 399–401 (Editorial)
most interested topics, 1–2 (Editorial)
partnership with Pediatric Endocrinology Nursing Society (PENS), 63 (Editorial)
primary reasons for manuscript rejection, 1–2 (Editorial)
review process, and time-taken in, 1–2 (Editorial)
special issue on endocrine system, 63–147

L
Lebanon
initiation and duration of breastfeeding in, 53–59 (International Pediatric Nursing column)
Life support decisions for extremely premature infants
parents', physicians and nurses involvement in, report of a pilot study on, 347–359
Lupron therapy
allergic reaction, a potential side effect of, 131 (Abstract)

M
Mark 1 kit
recommendations and guidelines for usage of, 477–484
McCune Albright syndrome
skeletal site involvement and pain in, 128
Meta-Analysis
for exploring the facilitative effects of children's drawings as facilitators of communication, 415–423
Mothers
employed/nonemployed, child care issues including children with special needs, 246–257
initiation and duration of breastfeeding in Lebanon, 53–59 (International Pediatric Nursing column)
Pocket Guide for Counseling the Nursing Mother (book review), 144
stress during pediatric hospitalization for chronic feeding problems, 268–275
Mother-to-child transmissions (MTCTs)
of HIV/AIDS, 211–212
Munchausen by proxy
vs mitochondrial oxidative phosphorylation, 133 (Abstract)
Music therapy
procedural-support in pediatric healthcare setting, cost-effectiveness of, 276–284

N
National Childhood Vaccine Injury Act [NCVIA]
guidelines on mandatory risk/benefit communication requirements, 469–476 (Clinical Practice column)
National Cooperative Growth Study
pediatric GH therapy non compliance, relationship with growth rate, 135 (Abstract)
NCGS, *see* National Cooperative Growth Study
Neonates, immature
reducing associated comorbidities, 45–46 (Child in the Community column)
Nerve agents
physiology and treatment of, 477–484
Nerve gas exposure
use of Atropine in children after, 477–484
NMFUP, *see* Nurse Managed Follow-Up Program
Nurse Managed Follow-Up (NMFUP) Program
for children with congenital hypothyroidism (CH), 128 (Abstract)
Nurse practitioners
How to Start an Independent Practice: The Nurse Practitioner's Guide to Success, 52 (Book review)
Nurses
and telephone triage, 424–429

role in healing children, 370–371 (Child in the Community column)
role in modifying risk of preschool unintentional injury (PUI), 441–447
role in promoting a peaceful end-of-life experience, 360–369
roles and responsibilities as a leader, 404 (Letter)
Nursing 'leadership'
redefining responsibilities of professional nurses, 231–233 (Editorial)
roles and responsibilities involved with the label, 404 (Letter)
Nursing knowledge
in relevance to global community, 34–44
Nursing telephone triage
and its influence on parents' choice of care for febrile children, 424–429

O
Obesity, *see* Childhood obesity; Children
in adolescents, associated risks, scientific guidelines and intervention strategies, 3–14
in children and adolescents, management of, 203–206 (Letter)
Osteopenia
relationship with hypogonadism, hypothyroidism and/or celiac disease, 132 (Abstract)
Ottawa decision support framework
for life support decisions for extremely premature infants, report of a pilot study on, 347–359

P
Pain
skeletal site and, involvement in McCune Albright syndrome, 128
Palliative and end-of-life pediatric care
integrated model for, 311–325
practice environment for, 311–325
role of pediatric nurses in, 311–325
Palliative child care, 309–310 (Editorial)
strategies for integrating into pediatric practice, 311–325
Parental perceptions
on continuity and coordination of care for children with life-threatening conditions, 335–346
Parenthood, invigorated
with disabled child, experiences of professionals' support, 288–297 (International Pediatric Nursing column)
Parenting
role in health-related quality of life and metabolic control in adolescents with diabetes, 373–382 (International Pediatric Nursing column)
Parenting, responsive
your child's unique temperament, insight and strategies for, 287 (Book review)
Parenting Stress Index
parent/caregiver stress during pediatric hospitalization for chronic feeding problems, 268–275
Parents
involvement in life support treatment decisions for extremely premature infants, report of a pilot study on, 347–359
roles and involvement in diabetes management of adolescents', 405–414
supervision and adult perception of injury risk, 441–447
Parents and families
participation in care giving to critically ill neonates, 45–46 (Child in the Community column)
Patients
childhood-onset GHD, transitioning to adult care, role of pediatric nurses, 136 (Abstract)
receiving GH therapy, improving continuity of care, 136 (Abstract)
with type 1 and 2 diabetes mellitus, education for, 137 (Abstract)
Pediatric cardiac transplants
patient care, preparing nurses involved in, 139–143
Pediatric endocrine nurses
beliefs and practice related to transitioning COGHD patients into adult care systems, 129 (Abstract)
transitioning the COGHD patient, 129
Pediatric end-of-life care
ethical dilemmas faced by nurses in, 360–369
Pediatric Expert Advisory Panels'
review on existing guidelines and recommendations regarding the treatment of children after nerve gas exposure, 477–484
Pediatric GH therapy
non compliance, relationship with growth rate, NCGS study, 135 (Abstract)
Pediatric nurses
role in modifying risk of preschool unintentional injury (PUI), 441–447
role in pediatric palliative care, 311–325

Pediatric nursing
health care disparities of children and youth as a concern for, 399–401 (Editorial)
Pediatric palliative care
an interdisciplinary educational approach for healthcare professionals, 326–334
integrated model for, 311–325
practice environment for, 311–325
role of pediatric nurses in, 311–325
Pediatric primary care
"Bright Futures" model for PNPs and physicians, integration of developmental assessment, 163–169
effect of educational preparation on accuracy of linear growth measurement in, 64–74
Pediatric resuscitation
family presence during pediatric resuscitation, advantages of, 145–147 (Clinical Practice column)
Perinatal Continuing Education Program (PCEP)
effective outreach educational strategy (Phase II), 227 (Abstract)
Physicians and nurses
role in life support decisions for extremely premature infants, report of a pilot study on, 347–359
Portugal
International Congress of Endocrine Nurses, 2004, abstracts presented at, 138 (Abstract)
Premature infants, extremely
parents', physicians and nurses involvement in life support decisions for, report of a pilot study on, 347–359
Preschool unintentional injury (PUI)
contributing factors to, a basis for nursing practice, 441–447
Professional nursing organizations
role in global organizational missions, 34–44
Pseudohypoparathyroidism (PHP)
type 1 a, AHO and resistance to multiple hormones, 133–134 (Abstract)
type 1b, rare disorder in children, 134 (Abstract)
Puberty
factors influencing the onset of, 75–82
Puberty, central precocious
anaphylactic reaction following treatment with GnRH, 131 (Abstract)

R
Racial and ethnic disparities, *see* Health care, disparities of children and youth, a pediatric nursing concern
Racial/ethnic differences
in adolescents' physical symptoms, 153–162
Recombinant insulin-like growth factor-I (RhIGF-1)
safety in treatment of children with IGFD, 135 (Abstract)
Recombinant parathyroid hormone (rhPTH)
therapy
for childhood hypoparathyroidism, 131 (Abstract)
Registered nurses
educational level, accurate measurement of linear growth in children, 64–74
rhIGF-1, *see* Recombinant human insulin-like growth factor
RN, *see* Registered nurses

S
Safe staffing
influence on patient care outcome, supporting nursing leadership, 231–233 (Editorial)
Self-injury nurses
as role models for preventing, 370–371 (Child in the Community column)
Short stature evaluation
phenotypic male with 46XX genotype, 132 (Abstract)
Short stature
treatment of, with recombinant human IGF-1, 135 (Abstract)
Smoke exposure, secondhand
among adolescents, 228 (Abstract)
and Head Start children, 227–228 (Abstract)
Society of Pediatric Nurses (SPN)
Society News, 230, 305–307, 396–398, 477–484
SPN News, 230, 305–307
Society of Pediatric nurses' conference
annual SPN convention, 2005, abstracts of, 225–229
Stiff man syndrome
with type 1 diabetes, symptoms of, 131–132 (Abstract)
Stress, parent/caregiver's
during pediatric hospitalization for chronic feeding problems, 268–275
Students, college
health promotion and risk behaviors of college students in rural setting, 25–33

T
Taiwanese
temporary residents in the United States, the decision-making process related to caring

for children among, 453–460 (International Pediatric Nursing column)
Telecommunication technology
advances in, from meeting room to telecommunication studio, 60–62 (Clinical Practice column)
Time management
in strategies to improve vaccine risk/benefit communication in the primary care setting, 469–476 (Clinical Practice column)
Total fertility rates (TFR)
social indicator of development, 53–59 (International Pediatric Nursing column)
Transaminases
elevation of, in diagnosis of celiac disease, 132 (Abstract)
Trisomy 21
and type 1 diabetes mellitus, screening patients with, for celiac disease, 132 (Abstract)
Turner Syndrome
multi-disciplinary management of, 136 (Abstract)
Turner Syndrome and hypothyroidism
screening patients with, for celiac disease, 132 (Abstract)
Turner Syndrome International Registry (TSIR)
web-based research and health care, 136 (Abstract)

V
Vaccine risk/benefit communication
time-efficient strategies to ensure, 469–476 (Clinical Practice column)
Vasoactive infusion Lines
methods of changing, 229 (Abstract)
Vasopressors
methods of changing vasoactive infusion Lines, 229 (Abstract)
VLBW, *see* Infants

W
Waist circumference
and body mass index (BMI), relationship between, in normal and obese children, 129 (Abstract)
Women, young
with GHD, impact of oral estrogen replacement therapy on GH dose requirements, 137 (Abstract)
Working Alliance Inventory
in pediatric chronic disease management, instrument reliability and feasibility, 190–200
Workplace model, international
nursing exchange programs to increase cultural sensitivity and nursing knowledge in relevance to global community, 34–44
